Name of Early Learning and Childcare Licensing Staff Veronique Berube		Position Title Quality Assurance Monitor	
Order for Compliance	Regulation	Date to be corrected	Date corrected

### General Comments

The Quality Assurance Monitor is on site for a monitoring inspection.

During the monitoring inspection, the following elements were verified:

- The child to staff ratio
- Child guidance
- Indoor play area

The QAM noticed a musty smell in the building. The QAM had a discussion with the administrator regarding this. The Administrator informs the QAM that the storage door was opened in the morning in order for the educators to clean. The QAM found the smell very strong and has concerns for the children and the educators. The QAM will contact public health to notify them.

The QAM also observed children sharing the same snack plate with cut vegies and hummus. The children were not observed washing their hands before eating. The QAM recommends to the Administrator that each child must wash their hand before snack time and for each child to have their separate snack plate.

The QAM observed the children arriving from school. The QAM also observed the children playing in the indoor play area, children were also observed playing ball hockey and creating stickers with different materials.
