General Comments
<p>Regular monitoring inspection was performed on this date. The open concept classroom allowed for children and educators to flow from one activity to next within the classroom while always maintaining supervision and ratio. The classroom as a whole was calm and inviting for children to independently select their activity. Children were observed engaging in a variety of activities throughout the inspection including sitting and reading, pouring water and sand and utilizing the blocks and animals.</p> <p>The transition to small group was smooth with children clearly understanding where to replace items within the facility.</p> <p>Small group time was divided by the age of the children, it was observed to be engaging for all children. Positive behaviour guidance was always observed.</p>
