General Comments
-Visit at the center for a regular monitoring inspection. -Ratio was respected during the visit. -Children and staff files have all the required information and documents. -More material will need to be provided for outside play. Material needs to be varied and in sufficient quantity for all children present. -A meeting point was identified in case of a fire. -It was recommended that the operator has a wagon on site to bring material at the outside play area. Observations: Children were into free play during the visit. Some were playing with instruments, others were drawing with the interactive screen, a group of children were working with the educator on the kinds of animals we find in Canada.
