## General Comments

The Quality Assurance Monitor is on scene for a monitoring. The ratio was respected during the inspection.

The Quality Assurance Monitor verified the following elements:

- Posting is in a visible and prominent place in the facility.
- Indoor play area and equipment
- Storage space
- Staff members record

The Quality Assurance Monitor observed the children transitioning to lunch time and then nap time. The QAM also observed in another class the children doing circle time, signing, and story time with their educator. The educator also made a guessing game with the children with forms and arrows (left and right). The children then made comparisons with real object in the classroom and would find an object of the same shape the educator showed them.

Positive interactions were observed between the children and the educators.

A new staff member was added to the system.
