General Comments

A Monitoring Inspection was completed this afternoon in the Afterschool Program. The grade 2's were playing quietly at my arrival. Two children were working on a craft, while two others were playing with Bots / Bionicles. The older children arrived shortly after, washed their hands, and then the entire group sat down together for snack. The children were observed eating apples, oranges, and crackers. The K-1's were observed both inside and outside. While outside, children had several activities to choose from. Most of the children chose to play in the small snowbank. While inside, the younger group was observed washing their hands, and sitting down for snack. They too, had apples, oranges, and crackers. Several forms of documentation were observed in both classrooms, and both classrooms were set up with several learning invitations. A conversation was had with Administrator regarding the parent board. QAM recommended that administrator post the original sized inspection reports (most recent for both renewal and monitoring), as the smaller print ones were difficult to read.
