General Comments

A Monitoring Inspection occurred on March 7, 2025.

Children were observed during indoor free play. Educators shared that children are currently interested in sliding like penguins outside in the snow, playing pool games, building with Lego, and creating art projects inspired by their own interests. Throughout the observation, educators used positive language and provided gentle reminders to support children's engagement and interactions.

The facility maintains a daily incident log, and outdoor play occurs for at least one hour in each four-hour block when the majority of children are in attendance, weather permitting. Monthly emergency evacuations are conducted and posted. The daily routine is displayed in each room, and evacuation procedures are posted in a prominent location. Life-threatening allergies are documented and visible.

Parents and children are greeted with enthusiasm upon arrival. Well-defined learning and play areas were observed, with several pieces of children's artwork displayed throughout the facility. A sensory area is available with sufficient materials for play, and accessories are provided and rotated regularly. Toxic products, such as chemical cleaners, are locked and inaccessible to children. Drinking water is available throughout the day. Children are provided with opportunities to express creativity, explore the arts and sciences, experience accomplishments, problem-solve, and develop trusting, respectful, and supportive relationships.
