General Comments

At the time of arrival and taking child/staff ratio steady interaction was observed with the children. Educators were engaged, by speaking with the children and asking them questions. Only positive child guidance was seen at time of visit. Licensing staff observed developmentally appropriate explanations and redirection. Educators were observed encouraging the children.

The activities are documented and pre-planned. Educators are using multiple ways to document children's learning such as learning stories and webbing. Children's work is displayed throughout facility and there are a variety of experiences introduced to the children.

Operator stated that they ceased serving lunches and snacks at the end of April. Children are now bringing all food from home.

Operator and educators have worked hard to maintain compliance with regulations. Licensing staff observed many positive changes within facility. This includes the filing system which at time of visit was much more organized.

Licensing staff can recommend facility for licensing pending a current health inspection. Fire inspector visited on day of renewal inspection and plans on forwarding report to Department.
