## **General Comments**

Name of operator

## Monitoring visit performed.

Since my last visit, the region has moved into the Covid Orange alert level. If you have questions regarding moving to a red alert level please do not hesitate to contact me. The department did send out an email to the sector on the weekend. The main change is with screening and temperature checks in the AM, mid day with children, staff and essential visitors. Please ensure staff wear masks that fit securely over nose and mouth. The screening protocols are being followed for children and staff. The operator screens children at drop off and also screened me, and asked for me to sign the log sheet. As per discussed please remind staff the importance of keeping bubble groups intact indoors and outside. Keeping these groups intact will minimize the risk of transmission and facilitate with contact tracing.

A daily log sheet as opposed to a weekly log sheet is required during the orange alert level. You can use either appendix D or the one for visitors. Attendance is still required to be documented and staff continue to do this. I did observe some cleaning sheets being tracked regularly. A Cleaning and disinfection schedule must be in place with clear responsibilities for all staff. Please refer to Appendix C (Covid ELC guidelines) and review the cleaning practices for indoor and outdoor materials and play equipment for different alert phases. It is very

## **General Comments**

important that toys and equipment are cleaned prior to being shared with another group. Also staff should be using a new cleaning cloth each time or paper towel.

Incident reporting - please ensure parents are signing so they are aware of the situation. As observed in one of the rooms and incident report occurred on January 15th and needs to be signed by the parent.

New shelving - lovely and assessable to children. New cribs have arrived for the baby room!! I would recommend using a cover sheet for the mattress pad, as this will make it easier to clean and sanitize.

Programming observed posted in all classrooms and hallways. The main purpose to post is for children, so please post their learning activities at their eye level so they can look and reminisce which will spur conversation and additional learning. Children were observed in outdoor play and at lunch and napping.

Just a reminder fire extinguishers will need servicing in February and for annual inspection.
