**General Comments**

Licensing Staff arrived at the facility to conduct a Monitoring Inspection. Upon arrival, the children had not yet arrived on site. Shortly after arrival, the first bus arrived. The children entered the facility and hung up their bookbags and personal belongings. Some children chose to have afternoon snack while others sat together in the main room as they waited for the rest of the children to arrive.

Once all children had arrived on site, the Educators clapped a song and let the children know it was time to line up with their group. Once the children were lined up, they washed their hands before transitioning to their play space. One group went to a classroom near the back of the facility, while the other group went to the main front room. Both rooms offered a variety of materials for the children to use. In the classroom, the children were observed coloring, playing with barbies, dolls and a large dollhouse while others built a tower out of magnetic tiles. All play materials were in good condition.

In the main front room, one Educator was observed playing chess with the children at a table while others read and colored. One Educator sat and acted as a referee while a large group of children played hand ball. The Educator explained the children have been showing an interest in Hand Ball. Changes have been made to the front room to allow the children more space and proper materials to be able to play hand ball.

Later in the afternoon the groups rotated play spaces. The children in the classroom went to the back gym area while the group in the front main room went to the front gym. Both groups were observed playing active games such as X-tag and elimination dodgeball. The Educators were spread out and engaged in the active games. Only positive child guidance was observed during today's Monitoring Inspection. It is evident the children are familiar with the routine and flow of the daily routine.
