Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

Licensing Staff arrived at the facility to perform a Monitoring Inspection. Upon arrival the children were sitting together with an Educator, preparing to wash hands for morning snack. The classroom was bright and organized. Current learning stories, pictures and process art were posted inside the classroom and in the hallway area near the cubbies.

As the children finished eating morning snack, they transitioned to free play. A large group of children gathered together, building a home out of magnetic blocks and added colorful wooden peg people inside. The children cheering "We did it, we did it!" as they built a house as tall as themselves. Another group of children prepared an art table, adding a variety of materials such as glue, pompoms, paper, googly eyes and scissors. Throughout the morning the children engaged in several activities in the classroom. Please ensure that the daily routine is flexible to meet the needs of the children. During free play, several children were observed throwing toys and running throughout the indoor play space. A change in schedule and environment is recommended during heightened activities.

Later in the morning the Educator announced it was time to clean up for lunch time. The children worked well together to put away play materials. One Educator sat and read several books and sang songs with the children while the other Educator swept the floors and sanitized the tables. Hand washing was observed before the children ate lunch. Only positive child guidance was observed during today's Monitoring Inspection. The Educators crouched down when engaging with the children and offered their assistance when needed.
