General Comments

The Quality Assurance Monitor is on site for a Monitoring inspection. The ratio is respected.

During the visit, the following elements were verified:

- Incident records
- Administrative records maintained on site
- child guidance in every classroom and in the outdoor play area

A daily incident log is maintained in all classrooms, showing child's name, date, time, record of event and parent's signature.

Children attendance records are accurate and reflect all children present at any given time; complete and showing all absences and detailing the reason.

Positive interactions between educators and children were observed. Educators are getting themselves to children's level to interact. Educators are giving one on one time to children when needed but are always present for the others. They were observed sitting on the floor playing with children.

New staff members' information is up to date and entered into the system.

While Quality Assurance Monitor was on site, she was able to observe snack time, transition to outdoor play, indoor free play and outdoor free play.
