General Comments

Monitoring Inspection:

Children and educators were observed engaged in a variety of activities this morning including stories, outdoor play, building, art and dramatic play. The infants were observed exploring their indoor play areas freely. Educators were observed at the children's level engaging in meaningful conversations and play experiences.

Nap time was observed today. The environment is dim, and educators put soft music on to ensure the environment is relaxing for children. The children's cots are set-up with bedding and are situated at an adequate distance apart. Educators observed comforting children as they settle in for nap.

Planning sheets are current and up to date, however there is limited current documentation displayed throughout the environments for children to revisit previous experiences, reflect on their learning, and support their current interests. A variety of documentation is to be added to each learning environment. Examples of documentation to be added by photos, children's art, collections, ongoing projects, interest webs, children's questions and conversations.

An inspection of the outdoor play area was conducted today. A variety of materials are accessible to children, and the outdoor play is free of hazards.

Chili and rice were served for lunch.
Handwashing routines were observed during washroom routines, after outdoor play and before mealtimes.
Diaper changing procedures were observed to be followed.
Monthly fire drills are documented.
Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection.
New staff file (4) review was completed; some proof of education and signed statements are missing from staff files. To be added.
Facility is currently meeting the 50% trained Early Childhood Educators (6/10) requirement.
