| <p>Comments: The inspector observed that the shaded area in the preschool-age children's playground is insufficient to provide the required minimum of 0.45 m<sup>2</sup> of shade per child. The outdoor play area must include a shaded space representing at least 0.45 m<sup>2</sup> per child, based on the maximum number of children permitted in the outdoor play area at one time.</p> <p>In accordance with Regulation 31(5.1), the required shaded area for this outdoor play space is 18.9 m<sup>2</sup>, based on a maximum capacity of 42 children. At the time of inspection, the available shaded area did not meet this requirement.</p> <p>The administrator informed the inspector that a new fence will be installed within approximately three weeks and that additional shade will be added along the fence line.</p> <p>The inspector informed the administrator that a change in service must be sent to the Quality Insurance Monitor to add a new fence to the outdoor play area.</p> <p>The inspector also requested that the administrator submit a written plan outlining how the required shade provision will be maintained and respected until the new fence and additional shade have been installed.</p> |            |                      |                |

Positive child guidance is observed such as speaking softly and respectful to the children and getting at their level to communicate with them.
