39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (a) toxic products, chemical products and cleaning supplies;	39(2)(a)	Feb 09, 2022	Feb 09, 2022
Comments: There are some quat spray bottles stored on a lower shelf inside a white cabinet located inside both classrooms. Although your diluted spray bottles such as quat does not need to be locked, it must be inaccessible to children at all times, and no child can reach them even with climbing or reaching. The spray bottles were moved before my departure and no longer accessible to children.			

<p>General Comments</p> <p>Upon my arrival the children were engaged in different learning activities. Some were playing with blocks while others were doing some arts and crafts. Soon after my arrival, the children got ready and went outside. While outside the children were playing in the nearby playground, playing on the structures and climbing the snow hills. The children came back inside, washed their hands and had snack.</p> <p>The Centre is clean, bright, and well organized. Lots of materials to meet the children's interest and learning needs.</p> <p>The staff are attentive and engaged with the children.</p> <p>Positive child guidance observed such a gentle reminders and encouragements.</p> <p>The Centre has a well-established routine and the children know the routine and transition well from one activity to another.</p> <p>I recommend for renewal.</p>
