**General Comments**

Children were just getting out of school when I arrived for today's monitoring inspection. They went outside to play right away.

Facility uses the school's playground as their outside play space. Because grades 3-5 were still in school, children played in the field next to the playground. While in the field children were observed playing imaginary play with sticks, paying soccer with an educator, playing tag with another educator, and just hanging out.

Children were observed eating snack outside. Educators ensured children were provided with hand sanitizer before and after eating.

Once school was dismissed for the grades 3-5, Go-Go was then able to move to the school playground's climbing structure. While on the climbing structure, children were observed playing grounders and tag with some educators.

Educators were observed interacting with children throughout the entire inspection. They were also observed providing an abundance of encouragement to all children at time of inspection.

All files observed were well organized and in compliance with regulation.

The school outside play space is checked regularly and findings documents as need be.
