General Comments
Licensing staff arrived at the licensed facility to conduct the annual license renewal inspection.
When licensing staff arrived at the facility the educators were just leaving to pick up the children from school.
The indoor play environment was very clean and organized. Licensing staff noted distinct play centres and invitations of play set up for the children to engage with. There was a cozy book centre, a dramatic play centre, a board game centre, a craft and mark making centre, a Lego and building centre, a truck and car centre along with a block and building centre.
The indoor play environment was clean and was very welcoming.
The educators and children went directly to the outdoor play environment when they arrived at the facility. The children were observed playing in the new fallen snow, playing with a variety of balls and played on the bleachers and grated bench as well as the stationary equipment at the nearby school.
All educators were engaged with the children and positively guided children throughout the license renewal inspection.
Staff files and child profiles were organized and complete with the required information.
Licensing staff recommends the licensed facility for renewal.
