Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

Arrived to perform annual renewal inspection. Nancy Glendenning was also present for the inspection. Children were resting upon arrival with one infant up and playing. Play area was observed to have a variety of developmentally appropriate materials. The play areas were well maintained, safe and clean with all pathways being clear. Documentation of learning experiences were observed through posted pictures and long-term projects present in the home and in the outdoor play area.

All children, staff and associated person files were completed with all required documentation.

Children prescribed puffers require a medication record to be completed and signed by parents and recorded for each time the puffer is administered. This will be followed up on during a monitoring visit.

During review of children's files, signed consent for a private pool was observed. Discussion was had with the operator about the requirements for private pool use. After this discussion the operator has decided to not utilize a private pool because of the lifeguard and ratio requirements for pool use.

During the inspection the diapering table was located in the main play area with the only available sink being the sink in the kitchen area where meals are prepared. Diapering is required to be separate from food preparation areas. Operator has agreed to relocate diapering area to the upstairs bathroom. This will be followed up on during a monitoring visit.

Fence around outdoor play space is beginning to show signs of decay, operator has ordered new fencing for this area and will also frame in the outdoor sandbox.

Positive behavior guidance was observed at all times. The operator and the children displayed a positive relationship and attachment and had pleasant conversations and interactions throughout the inspection.
