### General Comments

Play area was observed to have a variety of materials available to the children. Operator has a large dramatic play area, a sensory bin, craft area, books, to name a few. Operator has lowered and painted the shelving in the playroom to make the materials more accessible to the children. They also added a cozy, tented area for the book area.

The fence surrounding the small outdoor play area has been replaced and restored for the children to play safely in.

Positive behavior guidance was observed at all times. This group of children is very active and some of the children will test boundaries. The operator was observed being very calm and giving gentle reminders when needed. The conversations around behaviors were respectful and the children were engaged in them.

The outdoor play space outside the fence is currently snow covered. Surfacing must be checked in the Spring to ensure it meets regulation requirements.

Licensing staff was able to verify all documentation required for licensing purposes as the operator keeps complete and organized files.

I can now recommend facility for licensing.
