<b>General Comments</b>  A renewal inspection was conducted today.  The children were observed during inside and outside play, lunch, nap/rest, diaper changing and arriving from
---

General Comments

school.

The learning environments in each room have a wide variety of age appropriate materials for the children to interact and engage with. Children's learning is displayed in the form of learning stories, pictures and art. Children's portfolios have also been created and are available for the children to revisit their experiences at any time.

A variety of large loose parts are available in the outside play areas for the children to create structures and use their imagination during play. Recommending that the metal climbing structure in the school-age outside play area have more mulch added once all the snow/ice has melted.

Discussed with educators water tables and ensuring these are cleaned after each use. Recommending that during nap/quiet time they are emptied and cleaned and refilled if they will be using them in the afternoon. New Public Health Guidelines were released this week and recommending that all staff are aware of the changes and additions.

The educators were observed having respectful and meaningful conversations with the children in their care, getting down to their level to engage with them.
