General Comments

A renewal inspection occurred today.
During the inspection the Inspector observed that the school-age children were outside for the entire inspection except for lunch.
In the outside environment, the children were observed playing in the wooded fort area, playing a game of baseball, in the playhouses and engaged in conversations with their peers.
In the indoor learning environment, children have access to open cabinets where art materials, games, books, and puzzles are all displayed and organized for the children to use at their leisure.
All staff files and operator files were reviewed by the Inspector and verified complete. A random review of 15 children's files occurred and were verified complete.
It was also observed by the Inspector that the educators had Lego and board game centres set up with activities for the children to interact and engage in once they returned from outside play.
During the inspection, educators were observed speaking kindly and appropriately to the children and redirecting behaviors using positive child guidance techniques.
Planning of activities for the children is evident and observed by the Inspector and a list of summer camp weeks and field trips were also observed posted on the wall.
Facility is recommended for license renewal, pending the recommendations from Fire and Public Health.
