39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (a) toxic products, chemical products and cleaning supplies;	39(2)(a)	May 30, 2023	May 30, 2023
Comments: There was a can of Lysol spray in the cabinet upstairs that had a broken door. Therefore, the can was not locked and was on the lower shelf so accessible to children. There were two cans of Lysol spray in the infant room cabinets. Those were locked with a child safety lock, however, all toxic products must be lock by key. The cans were all moved to a locked closet before I left.			

General Comments
<p>When I arrived, the children were getting ready to go outside. They stayed outside until lunch time. While outside, one group was doing some drawings, some were in the sandbox, some were writing on the cement and others were pretending to be robots.</p> <p>There were paintings displayed outside in the infant playground that was done by the infants with objects found in nature.</p> <p>The outdoor playground is clean and free of hazards. A new sandbox was added since my last inspection. The centre is clean and well organized. Different materials are available to the children, including natural elements, loose parts, puzzles, materials for literacy, materials to learn letters and numbers, art supplies and blocks.</p> <p>The staff were engaged with the children, both indoors and outdoors. Positive child guidance was heard such has encouragements and positive reinforcement when the children were drawing outside.</p> <p>Purposely planned programming is evident, many learning stories are posted on the walls.</p> <p>One of the cabinet's upstairs had a broken door and it was leaning on the cabinet. The inspector asked that it be stored elsewhere because it could fall on the children, and it was removed immediately.</p> <p>I recommend for the licence to be renewed.</p>
