Comments: Deficiency is now compliant			

General Comments

Visit to the facility for the annual inspection. Ratio was respected during the visit.

An on-going treatment form was completed for a child and signed by the parent, however the daily log was not completed. The educator corrected this while I was present. Please review appendix 6 for instructions on logging daily administration of a medication.

The facility does not use the swings on the playground behind the school, only the play structure at this time.

During the visit children were playing in the cafeteria, one group was playing bingo, some were coloring and crafting, some were building towers and playing checkers. They were finishing snack when I arrived.

Once the fire inspection is received the facility will meet licensing requirements under the Act and and regulations and will be recommended for licensing.
