General Comments

Visit to the facility to complete annual inspection
Ratio was respected at the time of the visit

Discussion with educator-director:

- Educator was advised that the children can use the swings as the protective surface is of appropriate depth (but to avoid the last swing because surfacing is missing)
- Fire drills practice and monthly review and maintenance plan for the outdoor stationary equipment must be completed monthly.

Once the fire inspection and health inspection are received the facility will meet licensing requirements under the Act and regulations and will be recommended for licensing.

Observations:

- Children were into free play when I arrived, they then brought their baskets with their belongings to the

cafeteria and had their snack. Educator said that they would be going outside after snack time.
-Children used the washroom and washed their hands during our visit.
