### General Comments

A Monitoring Inspection occurred on July 23, 2025.

Children were observed during outdoor free play and their transition to lunch. Proper handwashing was observed during the transition indoors. Steps or platforms were available to assist children in reaching standard-sized toilets and sinks.

Educators shared that the children are currently very interested in outings to the splash pad and skate park, as well as outdoor painting and water play. They have also been engaged in tie-dyeing shirts and socks, will be running a lemonade stand, and checking off activities on their summer bucket list. Outdoors, educators were observed playing an active role in supporting and engaging in the children's activities.

The facility maintains a daily incident log, and a daily routine is posted in each room. There was a varied supply of age-appropriate equipment, materials, books, and toys available for the children. The changing area is located within one metre of a sink, and diaper changing procedures are posted and visible to those completing changes. Drinking water is made available throughout the day. The infant outdoor play area is either separated or scheduled at different times from other age groups. Opportunities were available for both individual and group experiences. Several forms of documentation were observed throughout the facility, reflecting active planning and engagement with the children's interests.
