General Comments
A Monitoring Inspection was completed this afternoon. The younger group of after schoolers had just arrived at my arrival. The children were observed washing their hands upon entering the centre. The younger group was observed painting, playing with marbles, and taking part in dramatic play – playing school and house. Several forms of documentation were observed throughout the facility – children's artwork was displayed throughout, and pictures of past activities were also observed. When the older group arrived, the younger children met them outside with paint and canvases. The entire group organized themselves into two smaller groups and formulated two circles in the driveway. Children sat at their portable writing tables and shared a pallet of paint with their circle of friends. Children were observed problem solving, working together, and supporting each other.
