<p>General Comments</p> <p>A monitoring inspection occurred today on the school-age program. The children were observed playing outside for the entire inspection. Children were observed playing ball hockey, sliding in the back yard, playing in the snow, and painting the snow. The indoor environment was also inspected, and the children's learning was observed documented and displayed throughout the room. Pictures, art, and learning stories were observed. Defined interest centres were observed set up and ready for when the children would go back inside to play and engage in activities. Attendance records were reviewed and observed to be completed. On the parent board all required documentation is posted: Operator information, inspection reports, license, daily routine, allergies, evacuation procedures, and the contact information for Quality Assurance Monitor and Inspector/Investigator. Operator was observed engaged with the children, tending to their needs, and using positive child guidance.</p>
