General Comments Upon licensing staff's arrival, the children had just arrived from the PSC school bus. The group transitioned indoors and stored their belongings on their designated hooks. The educators informed the children that they could either have snack or engage in free play. Snack was provided by the daycare. The environment is organized into several open-concept room areas, allowing children to choose where they would like to play while educators-maintained supervision throughout the space. Children who ate snack were advised to wash their hands before and tables were cleaned afterwards. Children were observed participating in a variety of activities, including building with LEGO and other blocks, engaging in imaginative play by pretending to play school, and completing their "All About Me" sheets with help from an educator. Throughout the visit, educators supported the children's play by suggesting activities, including inviting children to participate in a game of UNO, and providing reminders to work together to clean up the areas they had been using. Educators also conducted regular checks of the different activity areas throughout the visit. Monthly fire drills are completed, and staff and children's files were reviewed and found to be in order. Only positive child guidance was observed. Ratio was met at all times. Licensing staff recommends the program for renewal.
