Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

The atmosphere of the facility is very calm and loving. The operator moves between each child and gives them attention by talking to them and talking about the activities that they are engaged in. As the children were drawing the operator would write their words down that the children were telling her. A routine has been established and the children are given many opportunities to enhance their learning.

Medications are locked up but operator was unaware that medications in the fridge are required to be locked. Operator currently does not have any children that are on medication that needs to be put in the fridge, however operator stated that they will insure the medications are locked should the situation arise.

The operator's filing system is maintained in an organized fashion. It was very easy to verify all information pertaining to the regulations.

The operator promotes good hygiene practices. Observed children washing their hands upon entering the home, after play and before snacks, etc...

The outdoor play space could not be inspected thoroughly due to it being snow covered. I could not verify surfacing underneath the swing set. Operator stated that it is her plan to remove the play structure from outdoor play space. Outdoor play space to be inspected in Spring .

Children sleep upstairs. The two infants sleep in play pens and one preschool child sleeps on a mat. Children all sleep in separate rooms and are checked on every 15 minutes.

Operator stated that they have not had to use potential illness forms. Operator stated that when children are sick, the parents keep them at home.
