Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

There was only one child at time of arrival while other two children attended a preschool program. Child played happily on the floor while waiting to go pick up children at preschool program. Operator interacts with children constantly by playing and engaging in conversation.

Operator has developed a pre-written program and has some of the children's work displayed in the children's play space. Each licensing staff visit, progress and more quality evident.

Potential illness forms were not visible at time of visit as Operator stated that they have not had to use them. However, is aware that when a child becomes ill for any reason, the forms must be filled out and signed by parent prior to the children leaving the home.

Operator has an outdoor pool and stated that they had met all safety requirements for insurance purposes. Licensing staff recommends that children do not play on the deck leading to pool and the French doors leading to the pool from inside remain locked at all times. Operator stated that children do not play on deck during facility hours.
