General Comments

Monitoring Inspection:

The infants were observed exploring their indoor play environment this morning. They explored dramatic play materials and gross motor equipment. Educators engaged infants in meaningful conversations and supported them in problem-solving. A small group of children were gathered around their educator as stories were read.

The indoor play area is set-up with a variety of age-appropriate materials, arranged on low-open shelving for the children to explore freely. Materials are rotated weekly.

Purposeful planning is evident through documentation and materials added to the environment that support the children's current interests (music, mark making, and animals).

The indoor play area walls and floors are becoming damaged. The facility is currently planning fresh paint and new flooring. The QA Monitor will check-in on these repairs at next inspection.

Handwashing routines were observed during diapering routines, when new staff arrived in the room and after children's noses were wiped however the children did not wash their hands before eating lunch. Ensure hand washing is completed before each mealtime.

Diaper changing procedures were observed to be followed.

Infant Daily Information sheets observed to be completed throughout the day.

Monthly fire drills are documented.

Daily attendance records are accurate and reflect all children present. Child-to-staff ratio was observed to be met during Monitoring Inspection.

New staff file (2) review was completed; all required documents are in place.

Facility is currently meeting the 50% trained Early Childhood Educators (3) requirement.
