General Comments

Name of operator

A monitoring inspection was conducted today. The school-age room has a wide variety of materials to interact and engage with. An invitation for learning was set up just as the children arrive. "Please decorate our homes". The children are able to make/create/decorate houses made from recycled cardboard milk containers and loose parts. A village is being created with their creations with a sign to the entrance of the village, "Welcome to Learning Ladder Ville".

The children have been decorating for Christmas. There is a tree in the room, that the children help cut down, and they have made home-made ornaments that are hanging on the tree. A "fire place" with stockings has been created beside the tree to make a cozy area. Documentation supporting this process in the form of pictures and stories are posted throughout the room for the children to be able to revisit these experiences.

Discussed with administrator that a visitor log is needed for this room as it has a entrance/exit separate from the childcare. Those permitted to enter the facility may only come into the school-age room and not enter the childcare license. This was added during visit.

General Comments	
Discussed school-age planning with the educators and administ Daily Routine in the Operator's Manual. There is a section regard	
The educators were observed very engaged with the children, g and learning and having meaningful, respectful conversations. their environment and with their educators and were eager to shexploring.	The children appeared happy and content in
