| Order for Compliance | Regulation | Date to be corrected | Date corrected |
|---|---|---|---|
| 39(2) A licensed facility shall have a separate storage space under lock and key that is inaccessible to the children for each of the following: (b) medications. | 39(2)(b) | Nov 03, 2026 | Nov 03, 2026 |
| Comments: Children's Tylenol was found in the back closet unlocked. Medications are to be stored in a separate, secured storage area under lock and key and inaccessible to children. The Administrator removed the medication immediately during the inspection. Deficiency is now compliant | | | |

## General Comments

A monitoring inspection was conducted in the morning for the infant and preschool programs.
Children were observed engaged in a variety of age-appropriate activities, including painting, block play, dramatic play, and sensory play using Pop-Its. Educators were actively supervising children throughout the indoor environments and were observed supporting children's learning through interactions during play and story time.
Children were also observed participating in outdoor play experiences, including digging in the sand, riding toy vehicles, and going for walks within the surrounding neighborhood.
The indoor play environments were observed to be organized, inviting, and developmentally appropriate. A wide variety of materials and equipment were available and stored on low, open shelving, promoting accessibility and opportunities for independent choice. Photographs of the children, learning stories, and samples of children's artwork were displayed throughout the environments, reflecting the children's interests, experiences, and learning.
The following items were reviewed during the inspection: incident logs, fire drill records, indoor and outdoor play materials, attendance records, medication forms, and allergy documentation.
A random review of child files was conducted.
