<p>General Comments</p> <p>The Quality Assurance Monitor is on site for a monitoring inspection. During the visit, the QAM verified child to staff ratio, the outdoor play area and new staff member's files. The ratio was respected at the time of the visit.</p> <p>The gate to the fenced in playground was broken, and the operator is waiting on getting it fixed. In the meanwhile, the door is closed with a snap hook to prevent it from opening on its own. At the time of the inspection, the QAM does not see this as a safety hazard, however, it must be repaired, to ensure that the infant and preschool play area is enclosed by a securely gated fence. The administrator must advise the QAM when the gate is repaired, and it will be verified during the next renewal inspection.</p> <p>The administrator informs the QAM that tarps will be installed in the outdoor play area over the weekend to meet the 10% of shade requirement. The administrator will send picture to the QAM when installed.</p> <p>The QAM had a discussion with the administrator regarding designation requirements. The administrator informs the QAM that all educators are up to date with the professional learning hours, the parent committee members are having their meetings and the QIP is up to date. With that, all designation requirements are met for the renewal of the license, coming in September.</p>
