General Comments
Renewal Inspection: A renewal inspection was conducted in both the infant and preschool classrooms during the morning and afternoon. The infants and preschool children were observed participating in a variety of activities both indoors and outdoors. Indoors, children were observed during snack time, lunch, and nap time, as well as engaging in activities such as playing with playdough, cars and trucks, and blocks, mark-making with pastels, and listening to music. Outdoors, children engaged in sand play, blowing bubbles, riding toy cars, kicking balls, playing hockey, and interacting with their educators. The classrooms were arranged with a wide range of open-ended materials that supported children's play and learning. Materials were stored on low, open shelves, making them easily accessible. The educators shared that the infants and preschool children are currently interested in pumpkins, babies, transportation, cooking, blocks, and books. The documentation was current and reflective of the children's recent play experiences and interests. Photographs of the children and samples of their artwork were displayed throughout the indoor learning environments. The following records were reviewed: Incident logs, fire drill records, daily attendance records, infant and toddler daily sheets, professional learning records, a sample of children's files, and all staff files. Handwashing and diaper-changing practices were also observed during the inspection. Six staff members require additional professional learning hours to meet the annual requirement. These staff members are expected to complete their remaining hours by November 30, 2026. The Quality Assurance Monitor will follow up on this item during the next monitoring inspection. The Inspector discussed the following items with the On-Site Administrator: • Ensure art materials in the infant room are accessible to children throughout the day to support opportunities for creativity and self-expression. • The infant nap area currently accommodates four infants. Ensure infant playpens are spaced in accordance with regulations, providing a minimum of 2.3 m² per child. Infants sleeping in playpens must never be left unattended and must be supervised at all times. The facility is recommended for licensing.
