General Comments
Ratios were respected during the inspection. All classrooms have a variety of educator planning tools and documentation of children's learning on display. Classrooms are well provisioned and inviting; however as per the Fire Prevention Act that no more than 20% of the wall surfaces can be covered with combustible materials. Operator to consult with Fire Inspector about the leafy-vine wall in the infants room to ensure that it is permitted, and to ensure that all rooms are in compliance with the Fire Prevention Act. In follow up to conversation with infant educators about webbing their interests, QAM will send an article that they may find helpful as it expands on this topic.
