Order for Compliance	Regulation	Date to be corrected	Date corrected
31(3) An operator shall maintain the outdoor play area of a licensed facility to ensure the safety of the children.	31(3)	Nov 06, 2024	
Comments: The door is broken off the play structure and laying on the floor of the structure. The boards around the structure holding in the pea gravel is pulling apart and screws in one corner accessible. Please ensure the playground area is safe at all times and broken materials removed or repaired.			

General Comments
<p>Children were outside playing in their outdoor space. They completed a collaborative scavenger hunt that began inside and moved to the outdoors. The outdoor space is large and allows for lots of running, playing sports, and games. There is a variety of materials in the space to allow children independence and play such as balls, nets, swings, play structure, teeter totter, and a picnic table with shade. The outdoor play area has a trail beside it that provides the opportunity for walks and visiting a nearby frog pond. Educators engaged in play with the children while also allowing independence. They gave reminders of appropriate behavior and checked in with children to avoid issues.</p> <p>The indoor space is clean and organized with a variety of materials. The setup of the room allows for different areas to play and places to sit and play games or engage in art activities. Pegs are located on the wall in the cubby area with children's names and a basket located on a shelf above for each child. Washrooms were clean and included a hand washing sign in each one. A counter is located in one area of the room with boxes of cupboards to be installed with a sink.</p>
