General Comments During my unplanned afternoon visit, I observed that the required staff to child ratios were maintained for all age groups in attendance. In addition, younger children were not mixed with other age groups. - The outdoor play area is located less than 350 metres from the facility and is maintained in a manner that ensures children's safety and eliminates any potential hazards. It includes a shaded area providing a minimum of 0.45 m² per child, calculated based on the maximum capacity of the play area. - The play area features a variety of surface materials that support different types of play and activities. Areas designated for infants and preschool-aged children are fully enclosed by a fence at least 1.22 metres in height, with secure access points. The infant play space is separated from areas used by older children to ensure their safety. - The materials and equipment available are varied and sufficient in quantity for all children in attendance. According to the administrator, fixed equipment is installed in accordance with the manufacturer's instructions and is surrounded by a protective surface of appropriate depth. Observation of nap time and the snack provided by the daycare (vegetables, cheese, and crackers).
