31(3) An operator shall maintain the outdoor play area of a licensed facility to ensure the safety of the children.	31(3)	Apr 08, 2022	
Comments: Broken glass, rusty pieces of equipment, cans, metal containers and debris were noted to be accumulating within a specific area of the outdoor play space during today's inspection. Outdoor play area to be thoroughly assessed for safety hazards and cleaned up as soon as possible. Operator reports that the children are not using this area for play at this time. Children are not permitted within this area until debris has been removed.			

<p>General Comments</p> <p>Monitoring inspection visit was completed today. The children were observed within their outdoor play area. The children were noted to be exploring trees, large tree branches and eating their snack at time of inspection.</p> <p>Discussed debris collecting within a specific area of the outdoor play area with operator and educator and that the children are not permitted to play in this location until it was been removed. Operator reports that staff are using an outdoor play checklist that was developed specifically for their outdoor play area. Recommending that debris such as broken glass/rusty metal is added to the outdoor play checklist for routine monitoring.</p> <p>Attendance forms were observed on site and kept with one staff member who documents the children's arrival and departure times. Recommended for government attendance forms to be documented separately for each group (rather than as one group combined) and that these records are given to the staff member responsible for their corresponding group of children after the children have arrived. This allows for staff to conduct frequent head counts of their group of children to ensure the children's safety. This also allows for groups to separate to explore different interest areas within the outdoor play area, as attendance records should be kept with staff and their group of children at all times.</p>
