Name of Early Learning and Childcare Licensing Staff Robyn Nelson		Position Title Quality Assurance Monitor	
Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

A Monitoring Inspection occurred on February 21, 2025.

During the visit, children were observed during snack time, as well as during indoor and outdoor play. Proper handwashing procedures were followed during snack time, ensuring good hygiene practices.

Educators shared that the children are currently very interested in the maker station, building with loose parts, playing soccer outside, and creating art indoors. Educators were actively engaged with the children, playing an active role in outdoor activities and supporting their interests and exploration.

The facility maintained a daily incident log and displayed the license, current inspection report, current monitoring reports, and any orders for compliance in a clearly visible and prominent location. The daily routine was posted, and evacuation procedures were located in a prominent area for quick reference. Life-threatening allergies were also clearly posted to ensure the safety of all children. Books reflecting the children's interests were available, and well-defined learning and play areas were observed throughout the facility. Several pieces of children's artwork were displayed, celebrating their creativity and contributions. Drinking water was provided throughout the day to keep the children hydrated.

The curriculum was purposefully planned and documented in the program, offering a balance of individual and group experiences. Educators provided opportunities for curriculum extensions outdoors and made deliberate efforts to bring the natural world into the classroom environment.
