Address 283 New Maryland Highway New Maryland NB E3C 2H3			
Name of Early Learning and Childcare Licensing Staff Jennifer Godin		Position Title Inspector	
Order for Compliance	Regulation	Date to be corrected	Date corrected

General Comments

Children were preparing to go play outside when I arrived for today's visit. Educator ensured that all children had their water bottles with them and that they were filled with water before going outside. When outside, children were observed playing with different material, they were observed playing on the play structure, digging a great big hole in the corner of the playground, and playing hide and go seek. The educator was also observed partaking in the children's play while they were outside.

While outside 3 children from the after school licence were observed entering the outside play space that High Point Preschool licence was occupying. Please ensure that all gates between outside play spaces are able to properly latch to ensure licences do not mix and for the safety of the children.

When children came inside, the educator ensured that everyone washed their hands before they went and played freely around the room. Educator was observed providing the children with gentle reminders when needed. Once it was time to tidy up for lunch, the educator provided the children with ample warning before easing into a transition time by using a cleaning up song that caught all the children's attention and prompted them to start cleaning up!

There are currently no children who nap, but cots are still kept on site in case children request a cot to have a rest.

Facility promotes a very bright and welcoming environment. There is plenty of material for the children to play with that meet their interests. All materials are arranged on low and labelled shelving units which makes for easy and independent selection.

All administrative records that were observed today were well organized and in compliance with licensing regulations.

Educator informed me that the preschool children hardly ever use their smaller outside play space located at the back of building. A reminder that the small, gated area is still a licenced outside play space and must continue to meet all regulations.

General Comments

Everything is in compliance, and I recommend for renewal.
