Order for Compliance	Regulation	Date to be corrected	Date corrected
28(1) An operator of a licensed facility shall not change the allocation of space used to provide services or add to or alter any building or facility or any part of them unless the Minister has approved the changes in writing.	28(1)	Sep 17, 2021	
Comments: The licenced space upstairs is currently being used as a storage room. This space was licensed and inspected as measured childcare space, and in its current state children cannot safely use this room. It is important to note that should this room be continued to use a storage room; the licenced child space of this licence will have to be reduced. In addition, the department should be made aware of any changes to a licence space.			

<p>General Comments</p> <p>This licence currently only operates as a preschool facility.</p> <p>Children and educators were preparing for snack when I arrived. Once snack was finished, one educator had the children over to do music and movement activities while the other educator cleaned up the eating area. This is a great use time management to keep the children entertained during transition periods!</p> <p>Children were then observed playing outside. Educators ensured that all children were properly sun screened and had their water bottles with them. Educators were observed positioning themselves throughout the outside play area for supervision purposes and were actively engaging with the children while outside.</p> <p>The indoor environment is set up in a way that promotes independence by arranging all play material on low shelves so that children can have the choice to pick their own toys.</p> <p>Educators were observed playing with and being attentive to the children during today's inspection.</p>
