<p>General Comments</p> <p>The preschool program at this location is currently not operating.</p> <p>Children went directly outside to play when they arrived from school. Educators were observed ensure they strategically placed themselves outside to ensure they could properly supervise the children. Educator was observed cleaning up the year while supervising children.</p> <p>Once the grades 3-5 arrived from school, everyone went inside the facility. Children were provided the opportunity to have snack. Those who didn't have snack were able to play freely around the around the room. Some activities that the children were observed playing were Beyblades, reading, building and crafts. Children who wished to participate were able to break into groups to discuss and come up with an idea for their entrepreneurship project that they will be working on for the next little while.</p> <p>Educators were observed ensuring they were taking the time to chat with each group to see what they were working on/playing with.</p> <p>Educators have the intention of bringing all children back outside at the end of the day if the rain holds off. It was observed today that a child kept going into the other playground while the group of children were playing in the other gated area. Educators ensured the child was always supervised and was never left unattended. It is recommended that a gate be installed between both play spaces to ensure children stay in the appropriate side they are to stay in.</p> <p>On both gates to the outside play spaces, there is a couple of pieces of metal fencing that are sticking out at the children's level. Please have this fixed immediately to ensure the safety of the children.</p> <p>A reminder that both licensees located at this location must operate as their own individual license and cannot be mixed. Children must be always signed in/out of the license there are enrolled in.</p>
