General Comments

As the operator has taken down the fencing that was put in place without ministerial approval, the evacuation plans no longer have to change and therefore are currently meeting regulations.

As the operator has taken down walls without ministerial approval, a current inspection from both fire and health will be required.

Operator is now using the management of illness forms. There was also a notice to inform parents on the door.

The indoor fencing to divide the classrooms was taken down. The environment is back to its original approval. Please ensure that in the future all changes are sent to the department in the form of a change ins service application.

Please remove the table and fridge in the 2 year old space as discussed. The children are engaging in active physical play in that area and it poses safety risks.

A log is now being kept of any extra food that are served in each age group. Also, the operator is now serving breakfast to the children and must ensure changes to the current approved menu are kept on file.

There has been positive changes to the pre-planned program and documentation of children's learning. Please continue to build on this. The continuous progress will be confirmed on next visit.

Educators were out on a field trip to the library without a first aid kit. A full first aid kit must accompany each group when they leave the premises. There were two groups off the premises therefore there should have been one first aid kit with each age group even though they were going to the same place as one group returned earlier than the other group.
