<p><b>General Comments</b></p> <p>Children were resting upon arrival of licensing staff. Some children were dropped off and picked up during this time. Children should be kept in their regular classroom as consistently as possible, moving them to different rooms should be avoided to help children develop a strong routine with their classroom, educators and peers.</p> <p>Program planning was observed to be planned in advanced. Some documentation of learning was visible within the rooms. Educators should continue to build on this by expanding on the children's interests.</p> <p>Dog food and water was observed in the office, which was gated off from the indoor play area. The operator advised that a puppy attends the facility for small portions of the day. The operator was able to provide the health record for the puppy with all exams and vaccinations up to date. Operator and educators should continue to ensure that the puppy is not permitted to have free access to children's play areas and that children are observed at all times when interacting with the dog. Children's hands must be washed after contact with the dog. Parents must also be aware that there is a pet present at the facility, this can be within the parent handbook or signed consent.</p> <p>Facility was preparing materials to be used in the Santa Clause Parade that was coming up in the community. Positive behaviour guidance was observed at all times throughout the inspection.</p>
