General Comments

The Quality Assurance Monitor is on site in the afternoon to conduct a monitoring inspection.
The child-to-staff ratio is maintained throughout the visit.

While on site, the Quality Assurance Monitor verified the following areas:

- Washrooms
- Storage spaces
- Personal belongings
- Nutrition
- Outdoor play area
- Outdoor play area materials and equipment

During the inspection, the Quality Assurance Monitor observed children engaged in various activities, including playing indoors, eating snacks, and playing outdoors.

A discussion took place between the Quality Assurance Monitor and the administrator regarding the cabinet used to store toxic products. The Quality Assurance Monitor noted that although the cabinet is secured with a chain and key lock, the chain was not tight enough, allowing the doors to open wide enough for children to potentially access the contents. The Quality Assurance Monitor advised that the chain should either be tightened or the locking method replaced. The administrator responded that the cabinet doors typically do not open that wide and confirmed that the chain would be tightened.
