39(2) A licensed facility shall have a separate locked storage space that is inaccessible to the children for each of the following: (a) toxic products, chemical products and cleaning supplies;	39(2)(a)	Aug 15, 2024	
Comments: While inspecting the laundry room, licensing staff noted that there is a locked cabinet for toxic materials, such as cleaning supplies. Licensing staff also noted that some toxic materials (spray foam insulation, bug spray, etc.) were stored up high and out of reach of the children however, all toxic materials are required to be stored in a cabinet that is secured by a lock and key. Please ensure these products are stored in a cabinet or closet that is secured with a lock and key.			

General Comments
Licensing staff arrived at the licensed ELC while children were still being dropped off for the day.
The children were engaging in craft activities. The children were independently cutting out bunny ears, noses and tails along with other animal parts (tiger tails.)
The educator gave the children notice that it was almost time to wash their hands for morning snack. The children sat down at the picnic table outside to eat their snacks. Once the children finished their snacks, they carried over the craft making activities outdoors. The children remained outdoors until it was time to wash up for lunch.
Positive child guidance strategies, such as redirection, distraction and getting at the child's level and talking with about what they were doing, throughout the inspection visit.
