General Comments

A Monitoring Inspection occurred on May 28, 2025.

Children were observed engaging in both indoor and outdoor free play. Educators reported that the children are currently very interested in nature frames, playing GaGa ball, sharing memories from their time at the Boys and Girls Club, exploring dinosaur fossils through a paleontologist activity, and are excited for upcoming summer camps and field trips.

Educators were observed using positive language and offering gentle reminders, and were actively involved in outdoor activities with the children. The daily incident log is maintained, and parents of children currently attending are granted entry at any time. Monthly emergency evacuations are completed and posted, and evacuation procedures are clearly displayed in a prominent location.

The room is inviting, with thoughtfully arranged materials that encourage play. Well-defined learning and play areas were noted, along with children's artwork displayed throughout the space. Traffic areas and outdoor walkways are clean and free of clutter. Toxic products, including chemical cleaners, are securely locked and inaccessible to children. Drinking water is available throughout the day. Outdoor stationary equipment is surrounded by protective surfacing of appropriate depth, and a monthly safety checklist is maintained. Daily activities are purposefully planned and documented in the program, offering opportunities for both individual and group experiences.
