<p>General Comments</p> <p>I was screened upon arrival and my temperature was taken. This was the first visit since the center was licenced. Only one of the classrooms was being used at the time of my visit. The room is set up well with various centers for the children to play in. There are adequate materials and activities in the classroom for the children, and the center appears very clean. The room and the washrooms are set up in a child-centered way with child-sized furniture, sinks, toilets. The center provides all food for the children and today they had a well-rounded lunch. The children finished lunch and were settling in for a quiet activity.</p> <p>There was lots of pictures, documentation of activities, and children's work displayed in the entryway and throughout the center.</p> <p>The outdoor play area is spacious and is exceptionally maintained. I checked the amount of shade there is, as during licencing it could not be verified. There are two sides to the playground and the children are able to access wherever they would like to play. One side has an abundance of shade, and it is more than 10% of the entire play area, consisting of trees and a shade shelter. The other side of the playground does not have much shade. They do use a big umbrella to provide some, but I was told that they also have a shade structure ordered and are awaiting its arrival.</p> <p>The center appeared to be running smoothly during my visit.</p>
