General Comments

QA Monitor conducted a monitoring inspection in follow up to the opening of the facility. The purpose of the inspection is to verify items that could not be observed until after opening such as child guidance, group size, child files and documentation of children's learning, including Operator's planning tool(s).

Positive interactions were observed, between Operator and children. Child files are complete, group size is in compliance to the Regulations. Operator has created a portfolio for each child, in which she has placed a learning story. Additional stories, photos, etc will be placed in the portfolios as they are created. Some Remembrance Day crafts are visible on the wall. Operator has a notebook in which she has written her observations and made plans for their learning based on her observations.

Discussed a nature-based ECE website that might be of interest: "Littlepinelearners.com"
