General Comments

Renewal Inspection:

Upon arrival, licensing staff observed school-age children actively engaged in outdoor play. The children were interacting positively with peers and utilizing the playground equipment appropriately. An Educator inquired about a newly constructed area designated for ga-ga ball, built by the school. Licensing staff confirmed that the area may be used by the children, provided the surrounding wooded structure remains intact and free from damage such as splitting or breakage.

As the children transitioned indoors, they were observed practicing proper hand hygiene. Inside the facility, children participated in a variety of enriching activities including art (creating busy boards), chess, fort building, and dramatic play.

Educators were actively engaged in meaningful conversations with the children and demonstrated attentiveness to their needs. For example, one Educator promptly replenished art materials upon noticing they were running low, ensuring continued participation and engagement.

The following documentation was reviewed:

Incident logs, Fire drill records, Review and maintenance plans for stationary equipment, and Daily attendance sheets

All staff files were reviewed, and a random review of children's files was conducted.

Recommendation:

It is recommended that the art area be expanded to better support the children's current interest in art activities. During the inspection, licensing staff observed several children wishing to participate in art at the same time. Due to limited space and seating, the Educator had to redirect some children to other centers. Licensing staff suggested adding an additional table or expanding the designated art space to ensure all interested children can participate without limitation.

General Comments

The facility is recommended for continued licensing.
